

The SCS Program

Overview

Who We Are

We are a venture formed by Silveus Financial (a subsidiary of Silveus Insurance Group). Our sole focus is to help our agribusiness partners satisfy their marketing and hedging needs.

Who We Work With

Our partners are the first line of aggregators in the agricultural space; elevators, ethanol plants, feed yards - any group that originates or uses grain. Our partners are constantly searching for better services to offer their customers, more efficient methods to manage their operations, better ways to manage their risk and innovative ways to grow their business.

How SCS Works

- We provide our Partners a wide variety of structured grain solutions for marketing and hedging.
- Our Partners market/hedge grain using these solutions, according to their needs.
- We hedge our Partners' exposure using segregated brokerage accounts.
- Our Partners receive a percentage of the profits.
- SCS absorb all losses in the joint segregated brokerage account (defined as the marked-to-market pnl from the structure + hedges + hedging commissions), if any.

Benefits to Our Partners

- *Originate More Grain* - by offering your customers innovative and flexible programs to control their grain exposure, with no obligation on your part.
- *Technology* - to make your marketing efforts easy, we provide powerful web-based pricing and analytical tools at no cost to you.
- *Transparency* - access up-to-date prices for all structures online without having to call a broker. We allow you to view all hedging activity as it occurs with daily marked-to-market reports.
- *Ease of Use* - you do not have to create your own back office. We take care of all hedging needs, create all documentation required, and provide weekly updates of individual solutions.
- *Share in the Profits* - why give away significant potential profits to the big OTC desks? You keep a percentage of all profits generated, and SCS does not get paid unless you do first. Our incentives are aligned.
- *Be Protected* - any losses (defined as the marked-to-market pnl from the structure + hedges + hedging commissions) in the segregated brokerage account are 100% covered by SCS.
